

FAO Pullup impressions

**INTERGRATING NUTRITION INTO
EXTENSION AGRICULTURAL ADVISORY
SERVICES**

1

Diversification of nutritious foods through demand driven production and market supply

Increase demand for consumption of diverse nutritious foods through nutrition education, information and communication, including cooking lessons/ demonstrations

3

Better income generation for improved diet, health and hygiene e.g. through increased production of diversified food for sale. Can be as a result of better agricultural practices

Food and Agriculture Organization of the United Nations
